OTHER OBSERVATIONS:				
In water:	Salinity o/oo	Temperature C	Visibility depht in meters	Amount of epiphytes ++/+/0
.	5	8,2	> 3 m	+
In sediment:	Redoxcline depth in mm	Water content	Organic material	ph = 6.4 coastline ph = 6.8 open water
.	.	.	non (hard bottom)	

Shoreline: t^a 8,8 PO_4^{3-} 3mg/l NO_3^- 10 mg/l NH_4^+ 3mg/l
NO_2 < 0.02 mg/l
20 m from shoreline: NO_3^- = 0 mg/l NH_4^+ 0.2 mg/l PO_4^{3-} 0.5 mg/l
ph = 7,5

On this page you are welcome to supplement with further information, comments and critisism of this investigation.

Notes to the datasheet and evaluation of the results:

If you are unfamiliar with the Latin names of plants and animals, it is a good idea to write the names in your own language, before starting the studies.
In order to get comparable results from differnt schools and countries, it is essential that you follow the instructions for the user carefully.
